PROFESSIONAL SUMMARY

Software Engineering student with a strong foundation in Java, Spring Boot, and object-oriented programming. Experienced in building REST APIs and desktop applications, currently expanding into AI-powered backend engineering through the FlyRank Backend AI Engineering Internship.

TECHNICAL SKILLS

Languages: Java, C, Python (Basic)

Backend: Spring Boot, Spring Data JPA, Hibernate, REST APIs, Spring Security, JWT, Maven

Databases: PostgreSQL, H2, SQL

Tools & Technologies: Git, GitHub, Docker, Flyway, Stripe, Swagger/OpenAPI, Thunder Client

Core Concepts: OOP, Collections, Exception Handling, Dependency Injection, Authentication & Authorization, Async Processing, API Testing

EXPERIENCE

Backend AI Engineering Intern | FlyRank AI

Self-paced | Completed

- Completed a structured backend engineering internship focused on Java, Spring Boot, REST APIs, security, databases, asynchronous processing, Docker, and AI integration.
- Built multiple backend projects and a production-oriented billing capstone using PostgreSQL, Flyway, Docker, and Stripe.
- Implemented practical backend features including JWT authentication, quota enforcement, idempotency, secure webhooks, asynchronous workflows, and API testing.

PROJECTS

FlyRank Billing Capstone

Java, Spring Boot, PostgreSQL, Flyway, Docker, Stripe

- Built a usage metering and subscription billing backend with quota enforcement and subscription workflows.
- Implemented idempotency, Stripe Checkout, secure webhook verification, and replay protection.
- Used Flyway for database migrations and Docker for PostgreSQL infrastructure.

Spring Security JWT API

Java, Spring Boot, Spring Security, JWT, Swagger

- Developed a secure REST API with JWT authentication, authorization, user registration, login, and protected endpoints.
- Documented and tested API endpoints using Swagger/OpenAPI.

PDF Report Generator

Java, Spring Boot, PostgreSQL, OpenPDF

- Built a backend service for generating PDF reports using persistent application data.
- Implemented asynchronous background processing for report-generation jobs.

Async Scraper API

Java, Spring Boot, Jsoup

- Developed a web-scraping API with pagination, retry handling, and asynchronous processing.
- Implemented job status tracking using PENDING, PROCESSING, and COMPLETED states.

Hospital Management System

Java, JavaFX, Scene Builder

- Developed a desktop application for managing patients, doctors, appointments, medical records, and related operations.
- Applied OOP principles and designed an interactive JavaFX interface.

EDUCATION

COMSATS University Islamabad | Lahore Campus

Sep 2025 – Jun 2029

Bachelor of Science in Software Engineering

KIPS Education

Aug 2023 – Apr 2025

Intermediate in Computer Science (ICS)

LANGUAGES

English • Urdu • Punjabi
